Application/Control Number: 10/717,619

Art Unit: 1653

DETAILED ACTION

This paper is in response to the Applicant's election of the invention identified as Group I, claim 1, drawn to a protein of SEQ ID NO:2, filed on February 16, 2006.

Claims 1-10 are pending. Claim 1 is currently under examination.

This application is a CIP of 09/856,061 filed on 07/10/2001 now patent 6,831,151, which is a 371 of PCT/JP00/06351 filed on 09/18/2000.

Objection to Specification

The continuing data must be updated in the first paragraph of the specification.

Objection to Claims

In claim 1 the proper nomenclature for sequence identification is "SEQ ID NO:2" and not as currently presented.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101, which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,831,151. This is a double patenting rejection.

Art Unit: 1653

In the instant invention, claim 1 is identical to claim 1 of the U.S. Patent No. 6,831,151, which reads: "A signal transducer specifically expressed in mouse mast cells, which is a purified protein having the amino acid sequence of SEQ ID NO:2.

SEQ ID NO:2 of the instant invention and SEQ ID NO:2 in claim 1 of the U.S. Patent No. 6,831,151 are identical.

Conclusion

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Agnes Rooke whose telephone number is 571-272-2055. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jon Weber can be reached on 571-272-0925. The fax phone number for the organization where this application or proceeding is assigned is 571-272-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information about the PAIR system, see http://pair-direct.uspto.gov. Should you have any questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197.
